

STEM PERSON
OF THE
WEEK

Joshua Davies

IT Applications Systems Manager

Josh works at STFC Daresbury Laboratory as an IT Application Systems Manager and works to build custom software tools that help scientists and engineers use the latest technology for their research. Some of Josh's work is quick and requires him to fix problems that suddenly pop up, whilst other tasks are bigger and require a **logical** approach to make sure everything works smoothly and safely. Josh is really **passionate** about his job, and has been interested in technology since he was six years old! He enjoys the challenges that his job brings and is always **self-motivated** to learn new things.
